Practice with overleaf 3.20.19

appozulp

March 2019

1 Introduction

Today we are practicing using overleaf. We have to insert a photo. We also have to link our zotero bibliographies to this overleaf document

3   Conclusion

I think using overleaf for this project is a good way to learn how to write LaTeX, and might be a helpful tool for learning how to write my own website. I do not have a website but I would like to make one to host my CV instead of using linked-in, or researchgate, I feel awkward using those social media sites for professional things. As for the project, I think it would be easiest to just take an example template from overleaf and change the content. [1]
